PROJECTS / OPEN-SOURCE

Advanced Code Editor | Link   *Python , Tkinter*

In PUcode Hackathon, I made this project using Tkinter which is used to edit text and Python code in a flexible way and the unique feature is that it displayed the result with an animation that showed the Flow of the program.

Green Cart | Link   *HTML, CSS, JS, Firebase*

Green cart is an e-commerce platform that allows you to order groceries and vegetables from local vendors, as well as sell scrap items. We aim to provide convenience and support local businesses and communities.

Auto Brightness for Computers | Link   *Python, pyautogui, screen_brightness_control*

With this Auto brightness PC users can automate the brightness control on their devices , based on the Colour of the Screen , the brightness is adjusted. Its very dynamic and very helpful while watching video lectures.

CERTIFICATIONS

- PU Code Hackathon Participation Certificate - **Parul University, ByteXL**
- Computer Networks and Internet Protocol - **NPTEL, Skill India**
- LeetCode 50 days Badge - **LeetCode**
- AugustCode Hackathon Participation Certificate - **AugustCode Solutions pvt.ltd, Parul University, Tinkering Hub**
- Theory of Computation - **NPTEL, Skill India**

HONORS & AWARDS

- Participated in Pu Code Hackathon as the Team Leader
- Participated in the SIH Hackathon as a backend developer
- Participated in AugustCode Hackathon as the team leader
- Got a third prize in the Sketch competition in Parul
